**SIGDO KOPPERS IS ONE OF
THE LEADING INDUSTRIAL
GROUPS IN CHILE.**

Its products and services are
sold worldwide, and it has
production plants and operations
in America, Europe, Africa, Oceania
and Asia.

letter from the Chairman

Dear shareholders,

Below we present a summary of our Annual Report, in line with our commitment to report to all our stakeholders on the company's business.

After reporting for eight consecutive years according to the guidelines of the International Integrated Reporting Council (IIRC), the 2022 Annual Report was guided by the requirement in General Rule 461 of the Financial Market Commission of Chile where the objective continues to be presenting integrated financial information and sustainability performance.

Although the results of Sigdo Koppers S.A. and its subsidiaries were very good at the close of the fiscal year, 2022 presented major challenges globally because of the economic, social and political effects resulting from the pandemic and the Russia-Ukraine war.

In addition to the huge human impact, these situations continue to cause major problems in the chain of supply of all industries, and Sigdo Koppers and its subsidiaries are not immune to them. Despite the complex situation, our company achieved an historic performance, the result of a team of excellence, sound investments in assets and an operations internationalization and distribution strategy that has enabled us to confront this scenario satisfactorily.

Our internationalization strategy aims to ensure a commercial and production presence in the main mining centers in order to provide customers a reliable, quality supply. The result was that at the close of 2022, 53% of the company's consolidated income came from markets other than Chile. Today we can offer each customer what they need, where they operate, and cover markets with great projections and possibilities for expansion.

The company's consolidated income totaled US\$3,946 billion in 2022, an increase of 27% compared to the previous fiscal year. The net profit rose 36%, to US\$217 million.

The consolidated EBITDA for the fiscal year was US\$575 million, 33% higher than the previous year. This good performance was associated mainly with the improvement in the operating income of the Magotteaux Group S.A., Enaex S.A. and SK Comercial S.A. (SKC), the result of positive sectoral dynamics, an effective strategy to counteract the increase in the costs of their main raw materials, and successful operational efficiency plans.

As of December 31, 2022, Sigdo Koppers S.A. owned assets worth US\$4,587 billion and it was highly liquid, with consolidated cash of US\$411 million. Its debt ratio was conservative, with Net Financial Debt to consolidated EBITDA at 1.9 times.

US\$
4,587
million

is the value of the assets owned by Sigdo Koppers. The company is highly liquid, with consolidated cash of US\$411 million.

One of the fundamental commitments of our company is to contribute to community development. We are very proud of the scope of work of Fundación Chile Dual, which we created in 2015, whose purpose is to help improve technical education. This year 4,000 students at Technical-Professional High Schools (EMTP, as abbreviated in Spanish) participated in different programs such as school-work alternation, apprenticeships, technical, social and employment training, and professional internships.

We engaged with 286 Schools by giving talks on school-work alternation, refresher education for teachers and direct assistance. We continued to be part of the Center for Innovation and Leadership for Professional and Technical Education (CILED, as abbreviated in Spanish), and we worked together with the Ministry of Education of Chile on school-work alternation educational programs.

I would like to emphasize that for the eighth consecutive year, we were selected to be on the Dow Jones Sustainability Index, which measures company performance according to environmental, social and governance standards. Sigdo Koppers and Enaex were also included in the MILA Pacific Alliance Index, Sigdo Koppers for the fifth time and Enaex for the third. It is a regional index that recognizes the sustainable operation of firms belonging to the Pacific Alliance. We have also been members of the U.N. Global Compact for 15 years under which we are committed to contributing to the development of society and businesses. Enaex became a member in 2022.

As concerns innovation, we continued to work towards our goal of providing solutions to help customers increase their productivity, create new spaces of operation and provide safer conditions for workers. SK Godelius S.A. developed a robotic system to load sulfuric acid onto trains in the operations of Vale S.A. in Sudbury, Canada. The system, one of a kind, has the potential to transform the loading of hazardous substances in mining and other industries. For Minera Zaldivar, it also implemented a service based on the Spot robotics platform of Boston Dynamics, which monitors the pulleys of conveyor belts via thermal imaging cameras. For the ERG Group, it designed the basic engineering for a robot fleet that will take geological samples in the Saudi Arabian desert.

According to projections, 2023 will be a tough year in which our subsidiaries will continue to face difficulties in their different areas of business as a result of global economic conditions, but I am sure that our market diversification strategy, our competitive advantages and the quality of our human team will enable us to take on all challenges that may arise.

Sigdo Koppers S.A. provides products and services to mining and industry around the world and considers the execution of a complete sequence of activities and processes that create value for customers.

chain of value in mining and industry

The group integrates sustainable management to the chain of value to face situations and actual demands of its stakeholders, which reduces risks and is beneficial to all parties involved.

/01

DEVELOPMENT

/02

OPERATION

SIGDO KOPPERS INGENIERÍA Y CONSTRUCCIÓN GROUP S.A. (SKIC)

SKIC provides large-scale engineering, construction and assembly services in the mining, power generation and transmission sectors, for industrial projects, civil works, maritime operations and infrastructure.

ENAEX S.A.

Enaex S.A. is the leading producer of explosive-grade ammonium nitrate in the region and a leader in rock fragmentation services as well as in the development and sale of explosive products of a high added value.

SKC S.A.

SKC S.A. imports, distributes and leases machinery for mining, agriculture, transportation and industry.

ASTARA LATAM S.A.

Astara Latam is the representative of automobile manufacturers to industrial, mining and service companies.

/03

PROCESSES

MAGOTTEAUX GROUP S.A.

Magotteaux manufactures and sells cast parts and mill balls of a high added value used by large-scale mining companies and other industries like the cement industry, thermal power plants and dredging companies.

SK GODELIUS S.A.

SK Godelius develops technologies to optimize the operating processes of customers. It creates, implants and operates telecommand systems, the automation of machinery and production processes, among other developments.

/04

LOGISTICS

PUERTO VENTANAS S.A. (PVSA)

PVSA is the leading bulk port in the central zone of Chile. It provides transfer and storage services

FERROCARRIL DEL PACÍFICO S.A. (FEPASA)

FEPASA provides cargo logistics services and cargo transfers by rail and by truck.

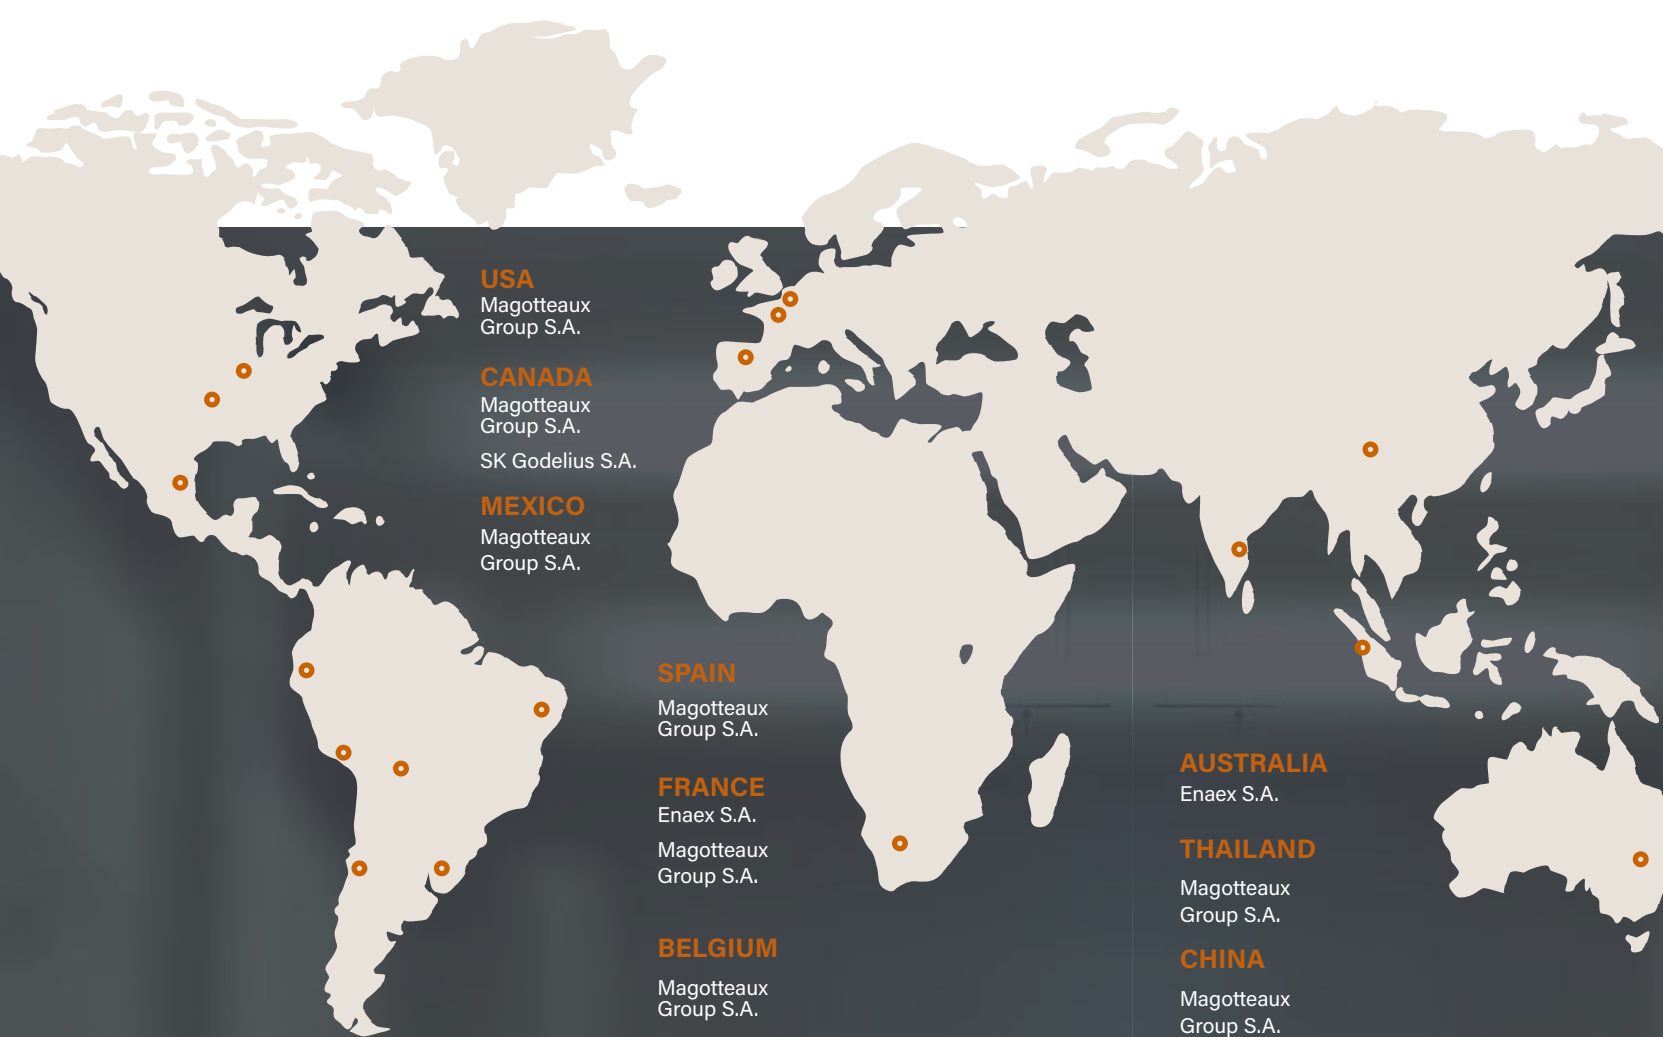

international presence

The company provides services and has production plants in 17 countries, and it has commercial offices in more than 30, consolidating an international presence on the five continents.

2022 contributions to trade associations

In 2022, there were no direct or indirect political contributions.

The General Manager of Sigdo Koppers S.A. is responsible for IT security/cybersecurity of the Group.

Number of breaches in FY 2022 of Corruption or Bribery, Discrimination or Harassment, Customer Privacy Data, Conflicts of Interest, and Money Laundering or Insider trading

: 0

Our Crime Prevention Model is aligned with the values of the company, in order to avoid any action that violates its principles. It is certified by BH Compliance and the company has a Crime Prevention Officer who safeguards its compliance.

risk management

Sigdo Koppers has a corporate Risk Management Policy that provides the main risk guidelines and the roles and responsibilities of the people and bodies in charge of the company's risk management process.

Risk management and administration are conducted by means of a process that considers the rules and regulations governing in Chile and in the countries in which the company operates, in addition to setting down guidelines according to the best practices of the industry in the world, such as those of the:

COSO (Committee of Sponsoring Organizations of the Treadway Commission); COBIT (Control Objectives for Information and Related Technology), TCFD (Task Force on Climate-Related Financial Disclosures), and ISO (International Organization for Standardization).

The company imparts ongoing training to employees in aspects relating to risk management. In 2022, Sigdo Koppers conducted training in Climate Change, the Crime Prevention Model, Cybersecurity, General Rule 461 and new ESG trends.

Risk analysis, especially relevant in a setting of ongoing change, is made globally, regionally and locally to review risks and evaluate mitigation strategies, in addition to a monitoring plan to address and track them.

The company has a Risk Committee that ensures that these processes are implemented correctly. It also analyses the potential impacts of the business decisions of subsidiaries and provides the necessary information to upper management. This committee is supervised by the Sigdo Koppers Board of Directors, which monitors its work quarterly.

Risks are rated as:

/01

Strategic

These risks are related to the strategic goals aligned to the organization's mission

- Definition of the Strategy
- Mergers, Acquisitions and Joint Ventures
- Economic Cycle
- Dependency on Key Employees
- Reputation Risk
- Innovation and Development
- Human Rights
- Social Risks

/03

Financial

Risks related to an effective and efficient use of resources

- Money management
- Liquidity
- Bond Covenant Compliance

/02

Operational

Risks resulting from deficiencies or failures in processes, people, systems or outside events, such as Climate-Change phenomena, considering both Physical risks (flooding, mudslides, tidal waves and ocean swells, droughts and water crises) and Transition risks.

- Subsidiary risks
- Systems and processes
- Cyber risks
- Fraudulent or illegal activities
- Climate change
- Regulatory risks and the risk of compliance with labor, tax, transfer pricing, Financial Market Commission, environmental, competition and customs rules and regulations.

THE COMPANY OPERATES UNDER A DIVERSIFIED BUSINESS MODEL THAT CONSIDERABLY MITIGATES THE RISKS DESCRIBED ABOVE. IT IS ALSO CONTINUOUSLY INCORPORATING THE BEST PRACTICES THROUGHOUT ITS CHAIN OF VALUE TO STRENGTHEN THE RESILIENCE OF ITS INFRASTRUCTURE AND PROCESSES. THE PURPOSE IS TO AVOID ANY DEVIATIONS IN PLANNING AND CONTROLS AND ANY NON-COMPLIANCE IN ANY OF THE ABOVE AREAS.

It is important to note that both environmental and social risks, which include Human Rights risks (HRs), are appropriately considered in Sigdo Kopper's Risk Management Policy. Social risks are managed by measurement, analysis and response procedures while a method and processes are being developed for environmental and HRs risks that are aligned with the new requirements in General Rule 461 of the CMF. This includes, for example, the means to conduct a due diligence of HRs risks in operations.

As with the Risk Committee, the Board of Directors of Sigdo Koppers supervises the risk management process implemented by management. This responsibility encompasses:

- approval of the Risk Management Policy and Procedure.
- approval of the risk profile and tolerance defined by management and proposed by the Risk Committee.
- staying informed on the critical risks of the organization.
- staying informed on the monitoring of progress in the critical risk action plans.
- approval of the annual budget proposed by the Risk Committee to implement critical risk action plans.
- receiving and analyzing the recommendations of the Risk Committee regarding risk management.

The risk management duty of the Chief Executive Officer is to align the company's strategy to Risk Management.

Therefore, the Chief Executive Officer plays an active role in the management, supervision, and control of risks and processes by identifying, analyzing, evaluating, treating, monitoring and disclosing those risks. The CEO must:

- encourage a "Control Culture" to ensure that the Company's officers are aware that the information comes from a well-controlled environment.
- ensure compliance with the Risk Management Policy and Procedure.
- understand the levels of exposure and adequately manage the identified risks of the company.
- ensure that action plans to confront identified critical risks are implemented.
- ensure that the company's risks are within the tolerance limits approved by the Board of Directors.
- appoint the Risk Management Officer.
- validate and evaluate the main critical risks identified in Sigdo Koppers together with upper management.
- design and maintain governance mechanisms to effectively manage and monitor the risks of Sigdo Koppers.

Also for risk management, the company has an internal auditing unit responsible for verifying the effectiveness of, and compliance with, the policies, procedures, controls and codes implemented for risk management.

As said earlier, in the aim of maintaining a work environment and business practices in line with its business principles, the company has set up whistleblower channel that is available to its internal and external stakeholders, who can use it directly or anonymously. Complaints may be related to violations of ethical standards, conflicts of interest, regulatory breaches or inappropriate conduct that must be reviewed by the Ethics Committee (www.sigdokoppers.cl/denuncias/).

Sigdo Koppers has a Code of Corporate Ethics to facilitate an appropriate management of regulatory risks, of the risks in business practices and in the relationships with stakeholders in general. That Code contains the Vision, Mission, Values and Principles of the company and its commitment to ethical conduct in all of its activities, including relationships with its employees, suppliers and customers, with the communities where it operates, with the authorities, and generally in any action in which it intervenes, regardless of the physical location where it conducts its activities and functions.

strategy.

The business objective of Sigdo Koppers is to grow profitably, continuously and sustainably. Sustainability is a specific, fundamental pillar in the company's strategy and vision. The Triple-Bottom-Line Strategy entails three basic pillars—economic, social and environmental performance—and it is complemented by a key facilitator that impacts transversally: innovation.

/01

ECONOMIC PERFORMANCE

This involves the economic and financial viability, corporate structure, growth and profitability of the business.

/02

SOCIAL PERFORMANCE

This refers to the community, employees, trade associations, and the authorities, among other relevant sectors.

/03

ENVIRONMENTAL PERFORMANCE

This means a responsible environmental management, care of biodiversity and a sustainable use of natural resources.

THIS INNOVATION FACILITATOR IS A BASIC TOOL IN ADDRESSING THE INTERESTS AND NEEDS OF THE STAKEHOLDERS OF SIGDO KOPPERS AND OF THE INDUSTRY. IT HAS BECOME A VIRTUOUS ECOSYSTEM OF COLLABORATION, ALLIANCES AND VALUE CREATION.

identifying stakeholders

Part of Sigdo Koppers' Sustainability strategy entails identifying all stakeholders central to its management. Stakeholders are analyzed on the basis of two variables: the impact caused by the company's activities and their influence in the company's decisions.

It is a priority of Sigdo Koppers that long-term relationships of trust and transparency be established with its stakeholders, so it has defined goals in relation to each.

stakeholders of Sigdo Koppers S.A.

internal

EMPLOYEES AND UNIONS

Employee experience is a fundamental part of the Group's sustainable management. It endeavors to promote the career and personal development of each. We aspire, together with employee representatives, to long-term, mutually beneficial relationships.

SHAREHOLDERS

The commitment of Sigdo Koppers to this group is to ensure the utmost growth and profitability through a responsible, proactive, sustainable management and a high level of innovation to face complicated challenges.

The company has been strengthening its commitment to its stakeholders by making progress, adopting new methods of planning and management and focusing its strategic decisions on the basis of sustainability and the world today.

external

CUSTOMERS

Sigdo Koppers believes that customers are at the core of the business. It endeavors to deliver highly competitive products and services of excellence to satisfy their needs.

SUPPLIERS

It aims to develop long-term, mutually beneficial relationships with suppliers and extend sustainability to all members of Sigdo Koppers value chain.

AUTHORITIES

The Group's relationship with the authorities is established on the basis of an absolute compliance with standards and regulations, the best ethics standards in the industry and the contribution, by its membership in trade associations, to topics important to the nation.

COMPETITORS

The Group has an honest and ethical relationship with its competitors in which it believes in free competition and a respect for the best business practices.

COMMUNITIES

Sigdo Koppers fosters relationships that help improve the quality of life of communities in view of their main interests and expectations.

sustainable development goals

The Group has policies promoting the hiring and career development of women in its companies, which is done through different programs.

Sigdo Koppers materializes its commitment to education, as a pillar of its community social development programs, through Educación Chile Dual Foundation and SK Capacitación.

Its companies have set the goal of progressively increasing efficiency in the use of water and energy resources utilized in their operations. In 2022, the use of renewable energy rose by 15%.

Sigdo Koppers wants to create the conditions for people to gain access to quality jobs by boosting internal training and job retraining via SK Capacitación, and through programs like those implemented by Enaex and Puerto Ventanas with the fishers in Mejillones and Las Ventanas. It is also encouraging the hiring of local labor and suppliers to help contribute to the social progress of the communities where it operates.

The company has adopted the additional commitment of providing workspaces that safeguard the interests, development and safety of its employees.

Sigdo Koppers believes that investments must be made in infrastructure and in technology innovation in order to make its business, the industry and the economy in general sustainable.

For the Group, using the highest technology is the way to increase production efficiency, outfit new operations to make them profitable, provide safe workspaces for employees and protect the environment. So, the Group's companies developed robotics, remote operation and augmented reality programs as well as new sales channels, among other initiatives, to improve their productivity and provide competitive solutions to their customers.

In 2022, the company began to implement a program that encouraged good practices of protecting biodiversity and ecosystems. One of the first initiatives was to survey protected sites and endangered habitats related to operations.

Sigdo Koppers fosters an institutional framework that establishes efficient, transparent regulations both internally and in the relationship with others. To do this, it has a sound corporate governance that responsibly assures the interests of all members of the company, shareholders and customers.

Sigdo Koppers promotes responsible production with a long-term view. To do so, it supports, among other things, technology innovations to make processes more efficient and circular economy and waste management initiatives. As a result of this effort, the freshwater consumption by operations fell 18% in 2022.

In order to create collaborative work structures, Sigdo Koppers fosters creating alliances with the public and private sectors and society as a whole. During 2022, the parent company and its subsidiaries continued to establish ventures: with the government for community development programs; with trade associations to strengthen the industry; with universities for the research and development of new products and innovations; and with organizations like the U.N. Global Compact. This has helped create a shared vision and goals and extend best practices.

In 2022 the Group continued to make progress in a strategy to make an effective contribution to mitigating the impacts that accelerate climate change. Circular economy programs and new technologies were implemented, the use of renewable energy was increased and it began a green hydrogen project.

CONSOLIDATED STATEMENT OF INCOME

INCOME

The consolidated income of Sigdo Koppers S.A. rose 27% compared to December 2021, to US\$3,946 billion. The main reason was the increase in activity in the Industrial Area subsidiaries—Enaex S.A. and Magotteaux Group S.A.—, followed by a good performance in the Commercial Area that was partially offset by a slight decrease in the Services Area.

OTHER RESULTS

As of December 31, 2022, the share in earnings of associates and joint ventures was US\$51 million, an 18% decline compared to 2021. The main reason was the decrease in income in Astara Latam S.A., mainly because of the depreciation of the Chilean peso against the U.S. dollar and a greater dynamism on the automobile market in Chile.

economic performance

OPERATING INCOME

The consolidated EBITDA was US\$575 million as of December 31, 2022, 33% higher compared to the previous fiscal year.

This comeback was the result of an improvement in operating income in the Industrial Area subsidiaries: Enaex (+46%) and Magotteaux (+84%).

PROFIT

The net profit totaled US\$217 million, or a 36% increase compared to 2021. This good result was associated with the positive performance of Enaex and Magotteaux. In the case of Enaex, Davey Bickford, Enaex South Africa and Enaex Brazil experienced better export conditions and increased operating income, in addition to the incorporation of Enaex Australia. In Magotteaux, the margins on high-chromium mill balls improved.

CONSOLIDATED BALANCE

At the close of 2022, Sigdo Koppers owned assets worth US\$4.587 billion. It also had adequate liquidity, with consolidated cash of US\$411 million and a consolidated net financial debt to EBITDA ratio of 1.86 times (1.97 times in December 2021).

Consolidated financial liabilities totaled US\$1.478 billion, an increase of US\$282 million. The reason was an increase in Enaex's debt (US\$553 million) as well as Magotteaux's (US\$222 million). At the parent level, financial liabilities were US\$257 million, comprised of corporate bonds for UF 5.0 million and bank debt for US\$50 million.

The total consolidated equity of Sigdo Koppers was US\$1.977 billion, a slight increase of 11%.

CONSOLIDATED STATEMENTS OF CASH FLOW

The consolidated operating cash flow was a positive US\$141 million as of December 2022, representing a drop of 42% compared to 2021. The consolidated investment cash flow was a negative US\$175 million. Investment in fixed assets (Capex) totaled US\$149 million. Of note are the investments by Enaex (US\$66 million) and Magotteaux (US\$21 million), mainly associated with maintenance Capex; and by SKC S.A. (US\$41 million) to renovate the SK Rental machinery fleet. Finally, the financing cash flow was a positive US\$91 million as of December 31, 2022.

Innovation is a core pillar of the development strategy of Sigdo Koppers and its companies. The ongoing effort to innovate is implemented in line with its fourth Corporate Value, Excellence, and its Triple-Bottom-Line strategy that considers Innovation to be a key facilitator that has a transversal impact on the Economic, Social and Environmental pillars of that strategy. This facilitator is a fundamental tool in addressing the material aspects in the relationship with the stakeholders of Sigdo Koppers and the industry, and it is becoming a virtuous ecosystem of collaboration, alliances and value creation.

The challenges entailed in Innovation and Development form a part of Sigdo Koppers' Risk Matrix. The Risk Committee monitors, evaluates, plans and manages the diverse actions undertaken in this respect. The company also has an Innovation Committee that specifically handles the subject in the Group and its companies.

Innovation also plays a central role in the search for solutions to the needs and requirements of customers and it is one of the key commitments of each of the companies comprising the Sigdo Koppers Group. This is a basic element in companies developing in a changing and exigent environment because it helps guarantee the safety of employees, business continuity, operational efficiency and long-term sustainability.

• CONVEYOR BELT MONITORING AT MINERA ZALDIVAR

SK Godelius was in charge of monitoring the conveyor belts at Minera Zaldivar used to heap material to be leached. Given the risks involved in the mining operation, especially because of the presence of sulfuric acid and hydrochloric acid, the utilization of Boston Dynamics' Spot robot resulted in a reliable assessment, protected workers and minimized the risk of damage to equipment or the process.

• ECOLOGICAL BLASTING SOLUTIONS

Enaex continued making progress in the HyEx project to install a plant to produce green ammonia from green hydrogen in the Antofagasta Region. The pilot plant is expected to begin production in 2025, capable of manufacturing, in the first phase, 36,000 tons of Clean Ammonium Nitrate. Several material milestones were reached in 2022, one of which was receiving Environmental Approval (abbreviated as RCA in Spanish) of the project. Enaex can now begin to request sectoral permits to build the pilot plant.

• WAVE ENERGY CONVERTER

Puerto Ventanas started up a project to generate power from the ocean's waves. The system, unique in Chile, was installed in the southwest sector of Berth 5 of the terminal pier. The project, developed with the support of Alu Energy and CORFO, will produce clean energy that will be used internally in the first stage, to later expand on a greater scale.

• MAGIMPACT

Magotteaux started up the first MagImpact, a vertical shaft impact crusher with impellers designed to create an optimal impact performance. The system was installed and began to operate in the operations of one of the company's customers.

DEVELOPING INNOVATIVE PRODUCTS, SERVICES AND PROCESSES CONTINUED TO BE THE FOCUS IN 2022. DIVERSE SAFETY, OPERATIONAL, DIGITALIZATION AND ENVIRONMENTAL INITIATIVES WERE IMPLEMENTED, AMONG OTHER ASPECTS.

CONSISTENT WITH THIS EFFORT, THE SIGDO KOPPERS GROUP AND ITS SUBSIDIARIES ALLOCATE SIGNIFICANT RESOURCES EVERY YEAR TO RESEARCH AND DEVELOPMENT.

OPEN INNOVATION

Sigdo Koppers companies participate in numerous open innovation projects by which they can make an intensive use of internal and external knowledge to accelerate innovation internally. In 2022, Puerto Ventanas participated in R&D workshops with Corfo and the Innovation Committee of the Valparaíso Business Association (abbreviated as ASIVA in Spanish). SK Godelius was awarded a 3-year research project together with Magotteaux, Vale Corp, Queen's University and Glencore on the optimization of the metallurgical process using pulp data. Enaex launched the open innovation challenge called "Focus on Optimization of Mixer Truck Fleets, Availability and Reliability," together with Innspirai, and it continued with its alliances with the Chilean Venture Capital Association and LETI CEA TECH in France; with Hotmilk, an innovation ecosystem of the Catholic University of Paraná; and with Advance Mining Technology Center, an institute of technological development of the University of Chile, among other initiatives. Magotteaux continued making progress in key projects that included simulation, modeling and data science. SKC worked with the factories of the vehicle brands it represents and with partners like Google, PMG, BBR BY EVERTEC, think tanks of the Catholic University, the University of Chile and University of the Andes, ICARE, BCG and GARTNER-GROUP.

social performance

The main objective in this area is to design objectives and achieve Shared Value goals with employees, customers, suppliers and the communities near operations.

Employees are a fundamental pillar in the company's work, so upper management promotes

transmitting ethics principles and Values that guide actions and foster a search, from a long-term perspective, for job excellence to attain results. Also key in this respect is implementing practices that guarantee employee health and safety, a respect-based work environment and teamwork.

Employees

In 2022, the Sigdo Koppers Group employed a total of 22,633 people. This report only considers the permanent employees of 15,912 in order to keep information traceable and comparable to previous years.

TRAINING AND DEVELOPMENT

The Group's companies imparted 449,785 hours of training in 2022. The programs focused mainly on developing talent so that the company has teams of excellence.

- THE "ENAEX YOUNG PROFESSIONALS" AND SK INGENIERIA Y CONSTRUCCIÓN "YOUNG TRAINEE PROFESSIONALS" PROGRAMS

Talent management programs aim to prepare outstanding youths by imparting training in leadership skills, technical training and accompaniment.

The Enaex program lasts 2 years and 33 people are participating. The SKIC program accepted 12 employees out of a total of 600 applicants. Its objective was to train high-potential youths who understand the company's culture.

- ENAEX GROW PROGRAM

The GROW program provides internal training of middle management in Enaex's operations who are seen to have a high performance and potential. The goal is to prepare them to be future leaders of the operation.

19.9

hours of training per person on average

Each subsidiary of Sigdo Koppers carries out individual and/or team performance appraisal, such as Management by objectives, Multidimensional performance appraisal (e.g. 360 degree feedback), Team-based performance appraisal, and/or Agile conversations, at least annually.

Average amount spent per FTE on training and development US\$ 330.

TALENT ATTRACTION AND RETENTION

OCCUPATIONAL HEALTH AND SAFETY

Occupational health and safety, building a risk prevention culture and a zero work accident policy are priorities for the company. On a corporate level, Sigdo Koppers provides the guidelines that are implemented by each subsidiary through Internal Regulations and Management Systems that are intended to prevent potential health risks to workers and people involved in activities. The results are monitored permanently by the responsible areas and by the Boards of each of the Group's companies.

Each subsidiary of the SK group has its own OHS policy and program according to the particular needs and realities of each company. In turn, the non-operating parent company Sigdo Koppers S.A. defined corporate guidelines in which each subsidiary must comply and guide its OHS management, included in the Corporate Code of Ethics, and the Supplier Code of Ethics and Conduct

suppliers

Sigdo Koppers aims to have a mutually beneficial relationship with suppliers and promote their development. It has an Evaluation Policy that sets down the directives to be followed prior to making a contract in order to know the quality of suppliers' corporate governance, their risk management system and other sustainability aspects, and to evaluate their performance during the provision of goods and/or services.

The company also has a Code of Supplier Ethics and Conduct that summarizes the principles guiding actions by suppliers, contractors, subcontractors and third parties who have a relationship with Sigdo Koppers S.A. In this same respect, a Group-wide project is being implemented to integrate all suppliers of subsidiaries in a centralized system of administration and time-of-payment records.

customers

Sigdo Koppers aims to provide products and services of excellence to its customers. Its team is oriented toward understanding customers' needs, developing the best solutions to those needs and meeting their expectations.

As part of its development strategy, Sigdo Koppers has sought, from the beginning, to build long-term relationships of trust with each of its customers. To that end, the Group's companies conduct satisfaction surveys and market studies from time to time to measure their performance, in addition to loyalty initiatives via after-sales monitoring and a thorough understanding of customers' processes so as to add value through the company's products and services.

community engagement

Sigdo Koppers considers education to be the tool to be preferred in improving the quality of life of people and employees. In this respect, it also promotes inclusion and equity, transversal pillars in education, by investing in training workshops for employees and other stakeholders. These workshops are held by its subsidiary, SK Capacitación S.A. and Fundación Educacional Chile Dual.

In 2022, more than 4,000 students attending Technical-Professional High Schools (abbreviated as EMTP in Spanish) took different programs, such as school-work alternation, apprenticeships, technical, social and job training, professional internships and pedagogical resources for diverse specializations. The Foundation engaged with 286 schools (30% of all schools in Chile) through school-work alternation talks, teacher refresher courses and direct assistance. It also continued to be a part of the Center for Innovation and Leadership for Professional-Technical Education (abbreviated as CILED in Spanish) and it worked hand in hand with the Ministry of Education of Chile on school-work alternation education. It was also able to add 4 companies to the network, in addition to the professional internships offered by 15 companies to students.

environmental performance

Each year, Sigdo Koppers S.A. reports, on a consolidated basis, several environmental indicators that are managed according to its Environmental Management Strategy and its Climate Change and Environmental Management Policy, based on the global commitments it has adopted, including the U.N. Sustainable Development Goals.

In line with the requirements in General Rule 461 of the CMF, the company decided to report certain environmental indicators of the SASB Standards because the Group is in the Metals and Mining category of the Sustainable Industry Classification System (SICS), although not all apply to its subsidiaries. Although it may be repetitive, exhaustive reporting by the two Sigdo Koppers subsidiaries listed on the Stock Exchange can be found in their respective annual reports and on their corporate websites.

Sigdo Koppers is committed to environmental care and protection. It continued working towards that goal in 2022 by designing an Environmental Management Strategy and a Climate Change and Environmental Management Policy, which are the groundwork for sustainable development and control of environmental considerations inherent to its business.

It has thus created a common framework for its subsidiaries around the world, where the priorities are:

objectives

01

Protecting the environment by preventing environmental impacts.

02

Environmental responsibility in its different areas of performance.

03

Adopting and abiding by applicable environmental regulations and signed environmental commitments.

CLIMATE CHANGE AND GREENHOUSE GASES

Sigdo Koppers is a business group with a global presence, so it promotes taking actions to help mitigate the crisis caused by climate change. It encourages its subsidiaries to implement strategies in line with the nature and impact of their activities and to quantify and reduce their carbon footprint over time. The goal is to anticipate the effects of climate change and the opportunities they represent.

The short- and medium-term strategy of Sigdo Koppers includes measuring Scopes 1, 2 and 3 of the carbon footprint of all subsidiaries in 2023 to standardize and set a base

year for the design of a long-term strategy that will include emissions-reduction goals and objectives according to the nature and size of each business or activity.

Its companies will therefore work gradually on designing a plan to strengthen technological innovation initiatives, to increase the use of renewable energy, to integrate new clean energy like green hydrogen, as well as circular economy initiatives that include: waste recycling, repurposing and reduction programs to progress towards a low carbon economy.

GREENHOUSE GAS EMISSIONS (GHG)

		2022
Scope 1: Direct Emissions	tons of CO ₂ -e	297,900
Scope 2: Energy Emissions	tons of CO ₂ -e	141,607
Scope 3: Indirect Emissions	tons of CO ₂ -e	2,234,882

Notes:

⁽¹⁾ *Enaex's coverage is calculated in relation to the income of each subsidiary as compared to Enaex's total income. The reported 79% includes: 44% for which there is external verification certification, including all of Chile, while the remaining 35% was calculated using the same standard but for which there is no external verification certification, which includes the plants in Brazil and South Africa.

⁽²⁾ SKIC was not considered at the close of this report. This information will be processed during 2023.

energy management

(SASB: EM-MM-130a.1)

To encourage a progressive increase in the efficient use of water and energy resources utilized in the operations of the Sigdo Koppers Group, it was decided that implementing an energy management system had to be

promoted as a tool for continuing improvement of energy performance in the operations that are large energy consumers. The goal is also to promote the purchase of energy-efficient products, services and raw materials.

*Discharges: The water returned to the source of withdrawal with a quality similar or better than the quality of the raw water withdrawn (Surface water sources).

water stress

(SASB: EM-MM-140a.1 / EM-MM-140a.2)

The Sigdo Koppers Group identified all industrial and production activities globally to determine whether they are located in zones with a moderate, high or extreme water stress.

The benchmark water stress measures the ratio between total water withdrawal and the available renewable surface water and groundwater supply. Water withdrawal includes water withdrawn for household use, industrial use, irrigation and livestock, both

consumptive and non-consumptive uses. The renewable water supplies available include the impact of water users upstream and large reservoirs for availability downstream. The highest numbers indicate that competition is greater among users (WRI Aqueduct, 2019).

The review was made according to the classification of the Aqueduct Water Risk Atlas of the World Resources Institute (WRI).

Total for Operations of Sigdo Koppers subsidiaries*

80

OPERATIONS IN WATER-STRESSED ZONES

waste and a circular economy

(SASB: EM-MM-150a.1)

One of the main reasons behind climate change is the effect of linear production and usage economic models that neglect to manage the waste produced by operations.

The Sigdo Koppers Group has focused on complying strictly with the regulations on the management of hazardous and non-hazardous waste and on promoting the adoption of techniques that optimize the use of resources and reduce the consumption of raw materials.

It also endeavors to create opportunities that consider reusing waste and repurposing materials that have finished their useful life by giving them a new use to extend that life.

biodiversity

(SASB EM-MM-160a.1)

Sigdo Koppers is aware that biodiversity is essential in caring for the environment. So, it decided to set a separate goal of promoting and encouraging all of the Group's companies to implement good biodiversity and ecosystem protection practices in line with the nature of their operations, the impact of their activities and governing laws.

As its initial action, Sigdo Koppers took a first survey of its operations where there are protected sites and habitats of species declared to be endangered.

MATERIALITY

Sigdo Koppers S.A. developed a materiality adjustment process that allowed defining the importance of issues for the organization and its stakeholders. The process was based on the GRI methodology, applying three stages that combine different methods of information gathering:

Materiality Matrix

REVIEW

This involves the economic and financial viability, corporate structure, growth and profitability of the business.

/02

IDENTIFICATION

Building upon the reviewed topics and stakeholder identification, surveys were conducted among employees of Sigdo Koppers S.A., employees of the Sigdo Koppers Group, and investors, allowing for prioritization of the aforementioned aspects.

STAKEHOLDERS	NUMBER OF RESPONSES
Employees of Sigdo Koppers S.A.	36
Employees Sigdo Koppers Group	19
Investors	10
Total	65

/03

PRIORITIZATION

The prioritization of the topics identified in the previous stages allowed determining which ones were material, meaning the most relevant both from a business perspective and for stakeholders. These topics are the ones that Sigdo Koppers reports in its reports and are part of its Sustainability Strategy.
